

SAY MERRY XMAS ELECTRICALLY OLD FASHIONED DUSTING FUTILE

Right Lamps to Use.

The living room in an average six room house or flat should have an average total of 275 watts for center, portable and bracket outlets.

The dining room—an average total of 150 watts for center light and bracket outlets.

Bedrooms require an average total of 100 watts for center light, bracket and boudoir lamps.

The kitchen should have an average total of 125 watts for center light and the lamp over the sink.

Halls, stairways, porches and attic need 50 watts each.

The laundry requires 200 watts divided among center light and lights over the tubs and the work bench.

The bathroom—50 watts.

The sewing room—125 watts for center light and sewing table lamp.

The garage needs 225 watts for a main light and a drop light over the workbench.

All lamps should be shaded. In the home frosted or diffusing lamps are desirable. Tinted lamps are adding the beauty of color in homes, but in order to modify all the light it is necessary to surround the lamps or light sources with colored silken screens. Silk shades are not hard to make and with their aid delightful tints are obtainable. However the use of opaque shades often requires 25 to 50 per cent greater wattage to give the same effective illumination.

BOSTON LIKES RANGES.

Electric ranges seem to be particularly well adapted to the baking of beans, if reports from Boston are any criterion. In the city of the sacred cod and succulent bean, no less than 3,500 electric ranges are in daily service and more are going in. Many of these are installed in apartment houses where it is not at all unusual for the builder to include an electric range as a part of the built-in equipment.

FAMILY POISONED.

CHARLESTON, W. Va., Dec. 3.—Poison from an unknown source caused the violent illness of the family of Ray Parks, of West Charleston. Mr. and Mrs. Parks and their two little children were dangerously ill for several days. Investigation disclosed no two members of the family had eaten the same diet during the previous day.

Five Million Candles

Illuminate Fountain

A stream of water, spouting seventy-five feet in the air, beautifully illuminated by ever-changing colored rays from four powerful incandescent searchlights, hidden beneath a glass at the base, will be the outstanding feature of what promises to be America's most spectacular fountain, which has just been erected in the sunken garden of Ferris plaza, facing the new Union station at Ballas, Tex.

It will be known as the pan-chromatic illuminated fountain, states the Edison sales builder. Colored floodlights have been used before in illuminating fountains, but never before has the scheme of using 5,000,000 candle power incandescent searchlights with constantly changing colored screens been attempted. The large basin is fifty feet across and the secondary or elevated inner basin is fourteen and a half feet in diameter.

In the outer water of the large basin are eight small jets, each illuminated by a colored floodlight from beneath. In the small basin, spouting water toward the main stream, are eight dolphins. Underneath the inner basin, which has a plate glass ceiling, is a circular chandelier, by 8 feet. This houses the four big searchlights and apparatus for operating the changeable color screens. Entrance to this is from a small passageway leading to a manhole on the outside of the larger basin. The entire system is automatic and needs no attendant.

Ad Club to Entertain

Notables at Luncheon

The Washington Advertising Club will have a notable array of important persons at its weekly luncheon at the Washington Hotel Tuesday, Louis Wiley, of New York, will make the principal address. Postmaster General Hays, Stephen Laurence, French journalist, Capt. Philippe Buneau-Villars, adviser of the French delegation, and Lord Riddell, British newspaper publisher, will be guests of the club also.

The luncheon, which will be open to the wives and members of the families of members, will be enlivened with an entertainment by the initiation team of the Kiwanis club. Leo Meyers will be chairman of the luncheon.

Boy Leaps From Buggy And Is Killed By Auto

WARRENTON, Va., Dec. 3.—Andrew Haley, aged about fourteen years, son of Mrs. Ella Haley, was struck by a Ford car, driven by a colored man named Bell, said to be from near Casanova, Va., and injured so seriously that death resulted almost instantaneously.

It appears that young Haley was in a buggy, in company with someone else, and, not being aware of an approaching car, jumped out. Haley was struck by the car and seriously wounded, his back being broken, the wheels passing over his head.

"Siam Soo"

"Siam Soo" is an East Indian doll that has just made her debut as a dancer in connection with electrically operated phonographs. Jiggy Jo and Shindy Mandy, black-face dolls, are more or less familiar to those who have the motor-driven phonographs, as they have been doing clog steps in time with dance records above the surface of the records.

"Siam Soo" is a new dance artist from the Orient, and she is exhibited in a novel way by a big New York company specializing in musical instruments. Soo is seen atop a record in a tiny theater with an Oriental background, consisting of minarets and a crescent moon, all electrically lighted.

Three Main Features of All-Electric Home

There are three features of special interest in the modern electrical home. It is wired for safety, it is lighted for utility and decoration, it is completely equipped with time and labor saving appliances.

In various cities such a home has been completely equipped and thrown open to the public for inspection. The newest home of this kind is in Louisville, Ky. Louisville's home is a white stucco house trimmed in green. Something more than work and material went into the building of the home. That something was thought—a consideration of the necessary work that is done in a home and careful planning for such work, as to reduce drudgery to a minimum, making the washing, cooking, cleaning, sewing simpler and easier, with a view of adding as many happy minutes as possible to the home-life of the family.

School at Landover Dedicated Wednesday

LANDOVER, Md., Dec. 3.—Dedication of the Landover Public School, took place, under auspices of the Landover Community Club, Wednesday night. Among the speakers were Superintendent Orem, T. Howard Thomas P. Littlepage, and Clarence M. Roberts. The Rev. J. E. Smith pronounced the invocation and Curtis C. DeNeane made the address of welcome.

The dedication committees and children were as follows: Reception, Mrs. Ernest M. Parker; decoration, Mrs. Frank Fitzhugh; refreshments, Mrs. James Rea; and program, Mrs. John J. Thompson.

CHARTER COAL COMPANY.

CHARLESTON, W. Va., Dec. 3.—Huntington financiers have formed the Landstreet-Downey Coal Company, of Burkh Mingo county, which has just been granted a charter of incorporation by the secretary of State. Operations will be established in the Tug river field. The incorporators are F. S. Landstreet, Jr., E. P. Rice, W. T. Smythe, R. T. Redd, and O. B. Burton, all of Huntington.

Have Your House Wired NOW!

KEEP YOUR OWN TEETH

Here's joyful news for every fleshy person who loves good things to eat, especially those who are denying themselves the things they like most because of their desire to keep down their weight or to reduce fat with which they are already burdened.

The famous Marmola Prescription has been put out in convenient tablet form and is now sold by druggists everywhere at one dollar per case—the world at large.

To get rid of fat steadily and easily, simply take one of these little tablets after each meal and at bedtime until you have reduced your weight to where you want it. No wrinkles or flabbiness remain to show where the fat came off.

Simply use Marmola Prescription Tablets according to directions; they are harmless, free from poisonous or injurious drugs. Try them for just a few weeks and get results without going through long diets of bread and starvation diet. Get them at any good drug store. If your druggist should not have them in stock you can secure them direct from the Marmola Company, 4612 Woodward avenue, Detroit, Mich., by sending one dollar.

Science has discovered that, although you may be able to tell a lie and keep a straight face, you can't tell a lie and maintain normal vision. Photo shows Dr. Bates demonstrating the retinoscope, with Miss Emily O. Lierman for a subject.

SALVATION ARMY OPENS NEW HOME

Services at 606 E Street Follow Parade of Workers in Downtown Section.

The new Salvation Army service house at 606 E street was dedicated yesterday at 2 o'clock, following a parade of 800 workers on Pennsylvania avenue.

The parade formed in front of the Evangeline Hotel, 1330 L street northwest, at 2 o'clock. It was headed by Commander Evangeline Booth and the Salvation Army National Staff Band. Delegations from the District of Columbia, the Chesapeake division and the New York division followed in order.

The parade was held in conjunction with the convention of the Salvation Army, which has been in session here all week and will end tomorrow. Fully 1,000 delegates are in the city.

The dedication services were conducted at 606 E street by Commissioner Thomas Estill, head of the army in the Eastern territory. The building, which is three stories high, is used as a new "Sal" neighborhood house, where services and meetings will be conducted and the usual neighborhood work performed.

This afternoon at 3 o'clock Commander Evangeline Booth will speak in Pol's on "The World's Greatest Romance." Assistant Secretary of the Navy Roosevelt will preside. Admission will be by ticket only.

Miss Booth will, at 8 o'clock, conduct a free meeting, when she will speak on "The Great Question."

TELLS IF YOU LIE

Experiments Show Necessary Air Currents Supplied by Electric Cleaners.

Dust, with its accompanying germs, has long been the traditional enemy of the housewife, but her old-fashioned sweeping methods frequently increased, rather than diminished, the bacteria content of the air.

The out-of-doors air, even in large cities, is not so full of these minute organisms as is the air indoors, because it is constantly being purified by the sweep of great wind currents. But indoors, the dust settles—one scientist has said that ordinary rooms, even though they are well ventilated, are actually dust and bacteria repositories. When anyone comes in and moves about, the bacteria are stirred up and circulate in the air and are taken into the lungs.

Sweeping with a broom greatly increases the number of germs floating in the air. Dr. T. M. Prudden describes tests carried on in the Boston City Hospital, which showed that the air was most pure at night, when no one was moving about, and that the general cleaning and sweeping routine was capable of increasing the number of germs on the average seventy times. It was found that sweeping nearly doubled the number of bacteria already in the air, after it had been disturbed by the other work of the morning.

"It is obvious," stated Dr. Prudden, "that unless the windows be wide open or liberal air currents in some way established, the too common method of so-called dusting—that is, the stirring up of the dust which has settled on the smooth places in a room, so as to allow it to settle again onto the rough surfaces or inconspicuous places where it does not show—does worse than useless, since the dust and germs are not in this way got rid of, but only redistributed and put for a time in a 'situation suitable for inhalation.'"

The "liberal air currents," which Dr. Prudden declares are needed in doors, are supplied by the electric vacuum cleaner, which so completely removes the dust from the room. This "dustless" method of cleaning seems to be the ideal method of disposing of the dirt which collects in the household without stirring up the dangerous germs. The electric cleaner, apparently, deserves its reputation as a safeguard for the family's health.

Tuberculosis Seals to Go on Sale Tomorrow

Booths will open tomorrow for the sale of Christmas seals to support the work of the Washington Tuberculosis Association. The booths, with the captains in charge, are as follows:

Woodward and Lothrop, Mrs. Sidney Thomas; S. Kann Sons & Co., Mrs. Aubrey Fisher; Layton's, Miss Carrie Hart; Willard, Dr. Ada Wahl; Shoreham, Miss Maude Collins; Wardman Park Hotel, Mrs. W. M. Conrad; Grace Dodge Hotel, Miss Mary A. Lindsey; Washington Loan and Trust Company, west end branch, Dr. Ada Wahl; American Security and Trust Company, Mrs. William Grinnell; Union Trust Company, Mrs. Henry Flatter; National Savings and Trust, Mrs. G. B. Powell; Metropolitan Bank, Miss Alberta Siebel; Riggs Bank, Mrs. Henry Thurtell; Washington Loan and Trust Company, Ninth and F streets, Mrs. William E. Chamberlin.

Laytonville Resident Dies at Age of 70

ROCKVILLE, Md., Dec. 3.—The funeral of William R. Griffith, prominent district farmer, who died on Thursday, aged seventy years, took place at 10 o'clock this morning from the family residence, near Laytonville. Rev. Dr. Kagey, rector of the Laytonville Episcopal Church, conducted the services. Burial was in Rock Creek Cemetery, Washington.

Youth Acquitted on Charge of Burgary

ROCKVILLE, Md., Dec. 3.—George Snouffer, a young resident of the vicinity of Laytonville, Montgomery county, was acquitted by jury in the circuit court here of a charge of house-breaking and larceny.

It was charged that he entered the home of Mildred Helm, near Laytonville, while occupants of the house were away, and stole \$45.52.

WOMEN TO MEET.

The annual meeting of the Women's Joint Congressional Committee will be held in the Cosmos Club tomorrow morning at 10:30 o'clock. The meeting will be followed by a luncheon.

Eats Candy But Loses Her Fat

Here's joyful news for every fleshy person who loves good things to eat, especially those who are denying themselves the things they like most because of their desire to keep down their weight or to reduce fat with which they are already burdened.

The famous Marmola Prescription has been put out in convenient tablet form and is now sold by druggists everywhere at one dollar per case—the world at large.

To get rid of fat steadily and easily, simply take one of these little tablets after each meal and at bedtime until you have reduced your weight to where you want it. No wrinkles or flabbiness remain to show where the fat came off.

If your druggist should not have them in stock you can secure them direct from the Marmola Company, 4612 Woodward avenue, Detroit, Mich., by sending one dollar.

KEEP YOUR OWN TEETH

Your dentist will not extract a tooth if there is any way of saving it, because he knows that even the best of artificial teeth are not as good as fairly serviceable natural ones.

But you have not done your own duty toward making your teeth last a lifetime unless you are using a dentifrice that corrects acid mouth, which is the principal cause of decay.

Dentists everywhere have been recommending milk of magnesia as a mouth wash to counteract acid mouth. But its good effect is obtained much more easily by using the new tooth paste made from milk of magnesia. Its name is Mag Lac, and it answers the double purpose of dentifrice and mouth wash.

The taste of Mag Lac is very pleasant, it leaves the mouth and teeth delightfully clean and sweet, and it has a very pronounced whitening effect. But most important of all it counteracts acid mouth perfectly and "helps you keep your teeth a lifetime."

Mag Lac is economical, too. The tube contains 156 inches of tooth paste. Using an inch twice daily, which is ample, it lasts eleven weeks, less than 5 cents a week for keeping your teeth in prime condition. Get a tube of Mag Lac today at any of the following handy Penlar Stores—All of Peoples Drug Stores in Washington are Penlar Stores.

ACCUSED OF TAKING BLIND VET'S VOUCHER

U. S. Agents Arrest Man Who Tried to Cash Another's Money Order.

NORFOLK, Va., Dec. 3.—Stealing from the blind is a saying that all are familiar with, but the practice is something different.

It actually happened in Norfolk, though, or at least postoffice inspectors and the Department of Justice are strongly inclined to the belief that it did.

Anyway, Oscar R. Miller, alias Mueller, is now in the city jail. Miller, of Tampa, Fla., called at the postoffice last Saturday afternoon and asked for a letter addressed to himself. The clerk had a letter addressed to Oscar H. Miller, mailed at Suffolk, and asked if that was the one. Miller said it was and took it, the clerk says. He opened the letter and found money orders for \$150 enclosed.

All went well until he presented the orders to the clerk at the pay window. This clerk questioned Mil-
